

Share2Care Weekly News

**WOW 2,710,390 (yes, almost 3 million) documents
have now been submitted into the shared record!**

Message from Dr Martin Wilson CCIO C&M Health & Care Partnership: What is Share2Care?

As we have entered a new national lockdown, we've produced a new video which you can access via our [YouTube Channel](#), to further support you in helping us to raise awareness of and encourage the use of 'e-Xchange', Cheshire and Merseyside's health information sharing platform, amongst clinicians in our region. Additionally we've produced a short survey which we'd like Cheshire and Merseyside clinicians to complete, to give us an idea of how they're using the platform: <https://www.surveymonkey.co.uk/r/PS95DPV>

It's crucial that we get as many clinicians as we can across the region accessing the e-Xchange platform, as it will support them in the daily delivery of **safer and more effective care to our patients**, which is particularly beneficial during these challenging times, with services being stretched due to a rise in COVID-related hospital admissions.

I'd be very grateful if you could promote this video and survey via your internal channels to ensure they get as much reach as possible amongst clinicians across the region.

We'll also be sharing the video and survey on our social media channels, so if you'd like to retweet these messages please visit: [@C_MPartnership](#) or [@Share2Care_S2C](#).

Grand Rounds

Following the brilliant response from the grand round at Alder Hey, one will take place in The Clatterbridge Cancer Centre on Wednesday 18th November!

Please follow us on our Twitter channel [@Share2Care_S2C](#), where you can watch past videos!

Blogs

Thank you to those of you who have so far sent in your video blogs about E-Xchange! We would like to see more so keep them coming!

Please send to zoe.hussin@adlerhey.nhs.uk or Angela.dawe@adlerhey.nhs.uk

Watch out for them on our Twitter page and don't forget to like and retweet!

DNAR Status

A request has been asked to look into the End of Life Care pathway even further, to share Do Not Attempt Resuscitation (DNAR) status data.

It is fantastic that clinicians are really engaged with Share2Care and are coming to us with suggestions and ideas of ways that we can continue to enhance the shared record.

CNS Team Royal Liverpool Hospitals

A fantastic meeting was held with the Lead Cancer Nurse at the Royal and the Acute Oncology Nurses, to demonstrate the Share2Care platform, we had some amazing feedback from this session, which has led to a further meeting being arranged with the Community Nurse Specialist to showcase our shared record.

Liverpool Women's NHS Foundation Trust

Shout out to the Share2Care Project Team at Liverpool Women's Hospital who are on track to be publishing ED Discharge Summaries!

A big well done to everyone involved in making this happen.
